\* You can find more information in [Solution 1-B3MR75](#).

## License Management

- R2015b network licenses require a license server running FLEXnet v11.13, which is provided by the MathWorks installer. A license server that is enabling multiple releases of MATLAB must use the version of FLEXnet shipped with the latest release of MATLAB enabled by that license server.
- Starting with R2016a, the License Manager is not available for 32-bit Windows.

## Support for Products on Operating Systems No Longer Supported

If you are enrolled in [Software Maintenance Service](#), MathWorks will respond to technical questions and provide workarounds when possible for a period of two years from the date when MathWorks ended support for an operating system. See the [platform road map](#) for more information.
